85-0919/

Canadian Data Report of Fisheries and Aquatic Sciences

These reports provide a medium for filing and archiving data compilations where little or no analysis is included. Such compilations commonly will have been prepared in support of other journal publications or reports. The subject matter of Data Reports reflects the broad interests and policies of the Department of Fisheries and Oceans, namely, fisheries management, technology and development, ocean sciences, and aquatic environments relevant to Canada.

Numbers 1-25 in this series were issued as Fisheries and Marine Service Data Records. Numbers 26-160 were issued as Department of Fisheries and the Environment, Fisheries and Marine Service Data Reports. The current series name was changed with report number 161.

The correct citation appears above the abstract of each report.

Rapport statistique canadien des sciences halieutiques et aquatiques

Ces rapports servent de base à la compilation des données de classement et d'archives pour lesquelles il y a peu ou point d'analyse. Cette compilation aura d'ordinaire été préparée pour appuyer d'autres publications ou rapports. Les sujets des Rapports statistiques reflètent la vaste gamme des intérêts et politiques du Ministère des Pêches et des Océans, notamment gestion des pêches, techniques et développement, sciences océaniques et environnements aquatiques, au Canada.

Les numéros 1 à 25 de cette série ont été publiés à titre de Records statistiques, Service des pêches et de la mer. Les numéros 26-160 ont été publiés à titre de Rapports statistiques du Service des pêches et de la mer, Ministère des Pêches et de l'Environnement. Le nom de la série a été modifié à partir du numéro 161.

Le titre exact paraît au haut du résumé de chaque rapport.

PREFACE

Tibbo et al. (1969) have compiled all available landings statistics for the 1933-1968 period. This data report presents the available landings statistics for the 1967-1982 period. A less detailed presentation of the landings is available in NAFO (formerly ICNAF) statistical bulletins. The majority of this information is available on magnetic tapes created by federal fisheries statistical offices in both Halifax, Nova Scotia and St. John's, Newfoundland.

ABSTRACT

McMillan, J.I., R.N. O'Boyle, L. Cleary, and S.N. Messieh. 1984. Compilation of Landings statistics of the southern Gulf of St. Lawrence herring (Clupea harengus harengus) for 1967-1982. Can. Data Rep. Fish. Aquat. Sci.

Landing statistics for the southern Gulf of St. Lawrence herring stocks were compiled for NAFO Divisions 3PN, 3PS, 4R, and 4T for the years 1967-82. Annual landings were broken down by NAFO Division of capture, region of landing, gear type, statistical unit area of capture, statistical district of landing and month. Most data were obtained from magnetic tapes available in regional statistics offices. These data were subsequently verified by comparison with the official statistics prepared by NAFO.

In addition, the catch statistics compiled from the purse seine log records for the years 1967-1981 are presented by month and statistical unit area. A comparison of the catch statistics and landings statistics of the purse seine fleet for the years 1967-1981 was made.

All data sources and deficiencies are discussed whenever possible. Unit area allocations in the offshore landing statistics are thought to be inaccurate whereas those in the catch statistics are thought to be the most accurate possible.

Key words: herring, landings statistics, catch statistics, purse seine

RÉSUMÉ

McMillan, J.I., R.N. O'Boyle, L. Cleary, et S.N. Messieh. 1984. Compilation of Landings statistics of the southern Gulf of St. Lawrence herring (Clupea harengus harengus) for 1967-1982, Can. Data. Rep. Fish. Aquat. Sci.

On a compilé les statistiques des débarquements de hareng dans la partie sud du golfe du Saint-Laurent pour les divisions 3PN, 3PS, 4R et 4T de l'OPANO, de 1967 à 1982. On a réparti les données sur les débarquements annuels suivant la division de capture de l'OPANO, la région de débarquement, la sorte d'engin de pêche, la région statistique de capture, le district statistique de débarquement et le mois. La plupart des données proviennent de rubans magnétiques conservés aux bureaux de statistique régionaux. On a par la suite vérifié ces données en les comparant aux statistiques officielles établies par l'OPANO.

En outre, les statistiques relatives aux prises de hareng, compilées à partir des journaux de bord des senneurs pour les années 1967 à 1981, sont présentées par mois et par région statistique. On a comparé les statistiques des prises avec les statistiques des débarquements de la flotte de senneurs, de 1967 à 1981.

Partout où c'est possible, on examine toutes les sources de données et les lacunes qui s'y rapportent. On pense que la répartition par région des données relatives au débarquement au large est inexacte, alors ques la répartition des données relatives aux prises serait aussi exacte que possible.

Mots clés: hareng, statistiques de débarquement, statistiques de capture, senne coulissante.

INTRODUCTION

The southern Gulf of St. Lawrence herring stock spawns over a wide area of the Gulf during both the spring and the fall and undertakes a winter migration across the Laurentian Channel to overwintering areas located along the southwest coast of Newfoundland (Winters and Hodder, 1975). Consequently, catches from many areas at different times of the year must be considered when studying the exploitation of this stock.

This document presents a breakdown of all available herring landings in the three Atlantic regions (Maritimes, Quebec, and Newfoundland) from NAFO Divisions 3PN, 3PS, 4R, and 4T for the years 1967-82 inclusive. It should be noted that the Atlantic zone is no longer subdivided as described here. Also, there were no landing statistics available from Quebec for 1982. The breakdown is by NAFO Division of capture (Fig. 1), region of landing, gear type (Table 1), statistical unit area of capture (Fig. 1), statistical district of landing (Fig. 2, Appendix A, B, and C) and month.

Also, included is a breakdown of catch statistics by month and statistical unit area compiled from the log book records of the purse seine fleet (Table 4).

Whenever possible, data sources are provided and data verification discussed.

METHODS

DATA SOURCES

To alleviate ambiguity throughout this document, landing statistics and catch statistics are defined. "Landing statistics" is defined as the round weight per species recorded by the purchaser on the purchase slip. "Catch statistics" is the round weight per species recorded by the captain on the log record.

Table 1 lists and translates the gear codes utilized. Most of these codes are those used by NAFO (Northwest Atlantic Fisheries Organization) along with a couple of new "creations" generated for this report only.

Table 2 presents annual reported landings (kg) of southern Gulf of St. Lawrence herring in NAFO Divisions 3PN, 3PS, 4R, and 4T. Table 3 presents these same landings broken down by region, gear, statistical unit area of capture, statistical landing district, and month.

Most of the data in Table 2 and 3 were obtained from magnetic tapes provided by the federal Economics Branch, Statistics Division in Halifax, Nova Scotia. Other sources include a magnetic tape provided by the federal statistics office in St. John's, Newfoundland and hand prepared landing reports from the provincial statistics office in Quebec City, Quebec. The exact source differs on a year to year basis.

In 1967, the federal office in Halifax began compiling, on magnetic tapes, all of the landings statistics for the provinces of Nova Scotia, New Brunswick, Prince Edward Island, and Quebec. Newfoundland landings data were added to the process in 1969. In 1973, the federal office in St. John's took over the responsibility for compiling the statistics for the Newfoundland landings. Commencing in 1978, the provincial Bureau de la statisque du Quebec in Quebec City assumed responsibility for the landing statistics in that province. A summary of the year to year sources utilized for the data contained in this report are presented in Appendix D.

The data presented in Table 4 were obtained from a detailed examination of all the available purse seine log records. Although some logs may not have been located, it is certain that the vast majority of existing logs were used in the compilation of this table. Logs were obtained from statistics offices in Newfoundland, Nova Scotia, and Quebec.

To tabulate the data in Table 4, set by set catches were first assigned to ten minute squares according to the reported latitude and longitude, following which all ten-minute square catches within each unit area were summed.

DATA VERIFICATION

By international agreement, the various statistics offices send the annual landings statistics for their region to the NAFO headquarters in Dartmouth, N.S. NAFO undertakes an extensive audit and edit of the incoming data before it is published in the NAFO Statistical Bulletins. Much of this involves examining gear by gear allocations of the landings and making adjustments where they appear necessary. For instance, if herring are reported as being landed by a scallop dragger, these landings would be reassigned to either purse seiners or gillnetters. Using any information available, reassignment of landings among gear type is done on a sometimes subjective, albeit, logical basis. Catch patterns and trends are often used to dictate how improperly allocated landings should be reassigned. Although no detailed description of this allocation procedure exists, the NAFO Statistical Bulletins are considered to be the most accurate source of landings information.

The data in Table 3 underwent a detailed comparison with the data available in the NAFO Statistical Bulletins. The data available in each Statistical Bulletin are not broken down by unit area nor statistical district and therefore it is only possible to verify NAFO Division totals, monthly totals, and gear type totals. Neither the Newfoundland nor the Maritime federal offices have landings in Newfoundland for 1967 and 1968 on magnetic tape. Consequently the data provided were simply extracted from the NAFO bulletins.

DATA USAGE

During the verification of the data virtually all monthly and annual totals agreed to within 1 or 2 t. The negligible difference is attributed to rounding the data to the nearest metric ton in

the NAFO bulletins. Some reallocation of landings by gear type did appear to be necessary. Consequently, gear totals do not always agree with those of NAFO. For example, in 1967, 30,000 t of herring, landed in the Maritimes, were reported to have been caught with either rakes, tongs or scallop draggers. To reassign these data correctly Fisheries Officers were interviewed to determine what the most likely gear would have been. In all cases, either purse seines or gillnets were indicated. Secondly, the offshore vessel code field (O'Boyle and McMillan, 1984) of the data record in question were examined. If the code was that of an 'inshore vessel' the landings were recategorized into gillnet landings. If the code indicated an offshore vessel the landings were recategorized to purse seine landings.

Major reallocations of data by gear type did not appear necessary subsequent to 1968 and thus none were carried out. However, when these data are examined, possible reallocations by the user should be kept in mind. For instance, scallop dragger landings are most likely incorrectly coded purse seine landings.

Another potential problem with the interpretation of these data develops from unit area allocations (Table 3). Log records from purse seine vessels are not utilized in the landings statistics compilation process nor for any vessel less than 25 gross tons. Unit area designations are derived from the purchase slips. The information on the purchase slip is usually filled out at dockside by the purchaser. At best then, the unit area indicated is a general area of fishing and should be used with this in mind. For gillnet landings, fishing normally occurs in the area adjacent to the statistical district of landing and could be considered relatively accurate. However, this is not the case for mobile purse seine vessels. For these, the log book records must be examined.

Herring landings by purse seine in Newfoundland (Table 3) through the early 1970s do not agree with those published by ICNAF. Through consultation with personnel in the St. John's statistical office it was decided to accept these data as accurate. After 1977 this problem no longer occurs.

The catch statistics of herring from purse seiners in NAFO Division 4T presented in Table 4 were obtained directly from the log records. As such, the unit area breakdown should be considered more accurate than that of Table 3.

Table 5 presents the annual purse seine catch calculated from the available log records as a percentage of the total annual purse seine landings of southern Gulf herring. It indicates a reduction in the difference between log record catches and reported landings over the time series of these data.

If it is assumed that there has been no bias in the reporting of unit area on the log records then these data (Table 4) could be used as a key by which to partition the purse seine landings of Table 3 into unit areas. Simply apply the percentage distribution observed in Table 4 to those data observed in Table 3. This has not been carried out here.

ACKNOWLEDGEMENTS

We would like to thank all the staff at NAFO headquarters and the various regional statistical offices who lent their time in helping us to prepare this document. We would also like to thank all the typists in both Dartmouth and Quebec City, and in particular Sharon Hiltz at B.I.O., for their extreme patience in the typing of these tables.

York	58

APPENDIX B

Quebec fisheries statistical landing districts.

Area	Stat. Dist.	From: To:
L'Islet	1	L'Anse-à-Gilles
		Pointe Rouge
Kamouraska	2	Point Rouge
		Saint André
Rivière du Loup to Rimouski	3	Notre Dame du Portage
		Sainte-Flavie
Matane	4	Sainte Flavie
		Capucins
Gaspé Nord	5	Cap Chat
		Rivière à Claude
	6	Duchesnay
		Saint Hélier
	7	Pointe à la Renommée
		Petit-Cap
Gaspé Sud	8	Petite Rivière au Renard
		Cap Gaspé
	9	Cap Gaspé
		Pointe Verte
	10	Pointe Verte
		Brèche à Manon
	11	Brèche à Manon
		Point au Maquereau
Bonaventure	12	Pointe au Maquereau
		Paspébiac
	13	New Carlisle
		Grande Cascapédia
	14	Grande Cascapédia
		Miguasha
	15	Miguasha
		Rivière Restigouche
Charlevoix	16	Cap Tourmente
		Rivière Saguenay
Saguenay	17	Tadoussac
		Rivière Betsiamites
	18	Rivière Betsiamites
		Rivière Sainte-Marquerite-en-Bas
Duplessis	19	Rivière Sainte-Marquerite-en-Bas
		Rivière Pigou
	20	Rivière Pigou
		Havre Saint-Pierre
	21	Havre Saint Pierre
		Kégashka
	22	Kégashka
		Baie des Moutons
	23	Baie des Moutons
		Rivière Saint-Paul
	24	Rivière Saint-Paul
		Blanc Sablon
	25	Ile d'Anticosti
Iles-de-la-Madeleine	26	Ile du Havre aux Maisons
		Ile de la Grande Entrée
		la Grosse Ile
		Ile Brion
		Ile de l'Est
		Ile Shag
	27	Ile du Havre Aubert
		Ile d'Entrée
		Ile du Cap aux Meules

APPENDIX C

Newfoundland fisheries statistical landing districts.

Area	Stat. Dist.	From: To:
A	1	Cape Norman
		Cape Bauld
	2	Cape Bauld
		Goose Cap
	3	Goose Cap
		Cape Fox
	4	Cape Fox
		Patridge Point
	5	Patridge Point
		Cape St. John
B	6	Cape St. John
		New Bay Head
	7	New Bay Head
		Farewell Head
	8	Change Islands
		Fogo Island
	9	Farewell Head
		Cape Freels
C	10	Cape Freels
		Newport
	11	Newport
		Salvage
	12	Salvage
		Western Head
	13	Western Head
		Cape Bonavista
D	14	Cape Bonavista
		South Head
	15	South Head
		Bonaventure Head
	16	Bonaventure Head
		West Random Head
	17	West Random Head
		Hopeall Head
	18	Hopeall Head
		Salvage Point
	19	Salvage Point
		Grates Point
E	20	Grates Point
		Western Bay Head
	21	Western Bay Head
		Feather Point
	22	Feather Point
		Topsail
	23	Topsail
		Cape St. Francis
F	24	Cape St. Francis
		Cape Spear
	25	Cape Spear
		Cape Broyle
	26	Cape Broyle
		Cape Race
G	27	Cape Race
		Cape Pine
	28	Cape Pine
		Cape St. Mary's
H	29	Cape St. Mary's
		Bauld Head
	30	Bauld Head
		Grandy Point

APPENDIX C (Cont'd)

Area	Stat. Dist.	From: To:
	31	Grandy Point Jean de Baie Head
	32	Jean de Baie Head Point Crewe
I	33	Point Crewe Point Rosie
	34	Point Rosie Boxey Point
	35	Boxey Point Pass Island
J	36	Pass Island Francois
	37	Francois Burgeo
	38	Burgeo Rose Blanche Head
	39	Rose Blanche Head Cape Ray
K	40	Cape Ray Sandy Point
	41	Sandy Point Cape St. George
L	42	Cape St. George Long Point
	43	Long Point Bluff Head
	44	Bluff Head Cape St. Gregory
M	45	Cape St. Gregory Martins Point
	46	Martins Point Daniels Harbour
	47	Daniels Harbour Point Riche
N	48	Point Riche Ferrole Point
	49	Ferrole Point Cape Norman
O	50	Blanc Sablon Cape St. Charles
	51	Cape St. Charles Indian Tickle
	52	Indian Tickle Cape Harrison
	53	Cape Harrison Cape Chidley

APPENDIX D

Data sources for the reported herring statistics. 1) Halifax, 2) Quebec City, 3) St. John's, 4) ICNAF Statistical Bulletin.

Year	Region of Landings		
	Maritimes	Quebec	Newfoundland
